PROFILE

I am a calm, focused, communicative, and present person, which is reflected in my approach to meeting people and customers. In customer service situations, I am friendly and helpful, for example, by guiding people in matters related to site safety during my time at construction site. I am capable of precise and accurate work if urgency is not a priority. My physical fitness is good, so I am also capable of various physical tasks. My relevant skills to the employer also include general knowledge of electronics and installation of hardware and software. My strengths include information gathering, problem solving, and achieving results through thoughtful and calm actions.

WORK EXPERIENCE

CONSTRUCTION ASSISTANT, NAPAPIIRIN KULJETUS OY ROVANIEMI - 2017

My tasks included assisting an excavator operator in delivering goods, installing pipes, monitoring safety, and performing other supporting tasks. For example we were responsible for completing many drainage projects during summer. Including that, we often

did landscaping work, such as backfilling and seeding lawns. This was my first summer job, which lasted for about a month.

CONSTRUCTION ASSISTANT, LAPIN MAA- JA KONETYÖT OY ROVANIEMI – 2018

My work mainly consisted of installing pipe trenches, including drainage systems, and preparing water supply lines. Landscaping work, such as backfilling and lawn planting, was also a big part of my tasks, and my responsibilities increased as I assisted the excavator operator in monitoring electrical cables and other underground cables during excavations. I also acted as a guide for residents on construction sites and installed safety elements on the construction site as needed.

CONSTRUCTION ASSISTANT, LAPIN MAA- JA KONETYÖT OY ROVANIEMI – 2019

In 2019, my job description changed significantly from previous years, although I also performed similar tasks this year. I spent most of my working hours involved in the preparation of house foundations, both internal and external backfilling, and as an assistant and roller operator.

PROJECT WORKER, LAPIN MAA- JA KONETYÖT OY ROVANIEMI – 2020-21

During the productization project of Lapin Nastis® gritting gravel, my role included various tasks ranging from manufacturing gravel bags to product design and launch. I have been involved in the project from the beginning, creating a new product for the market. During the design process, my tasks included business planning, marketing planning, marketing communication, material design and procurement, packaging design, meetings with retailers and other partners, and monitoring product quality. Physically, I have been involved in manufacturing gravel bags for sales and delivering them to customers. I found this particular project to be the most exciting combination of tasks that I have had the opportunity to develop and prepare for in my career.

Through this project, I have learned teamwork skills, independent work, and the process of business and product development from idea to marketing. I have also developed the courage to clarify things, such as work methods or material availability, and I am willing to raise issues I have noticed, but I can also celebrate our successes and provide feedback -

both positive and negative - on product quality variations during different stages of production.

EDUCATION

LYSEONPUISTON LUKIO, ROVANIEMI — MATRICULATION EXAM, 2020

WORK SAFETY CARD — 2021, VALID FOR 5 YEARS

HYGIENE PASSPORT — 2021, VALID INDEFINITELY

DRIVING LICENSE CLASS B, A1, T

SKILLS

My skills include working with electronic devices, such as installing hardware for my close circle. My English language skills are very strong, especially verbally. Verbal skills also include my ability to engage in conversations. I also enjoy reading literature, especially philosophy, which has always been a strong interest of mine. As a result, I have developed open-mindedness towards different people, cultures, and perspectives, and I am able to discuss disagreements in a respectful manner.

HOBBIES

In my free time, I enjoy going to the gym and skiing, as physical exercise helps me to relieve stress and gives me a sense of well-being in the moment, providing a pleasant feeling afterwards. In addition to reading, I also keep my brain active by practicing chess tactics and strategy, and playing chess alone or with a friend several days a week.
